Currency risk arises when future commercial transactions and recognised assets and liabilities are denominated in a currency that is not the Issuer's measurement currency. The Issuer's management monitors the exchange rate fluctuations on a continuous basis and acts accordingly.</p> <p><i>Capital risk management</i></p> <p>The Issuer manages its capital to ensure that it will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance.
