# You are about to purchase a product that is not simple and may be difficult to understand.

# What is the Product?

### Туре

Cyprus law governed over-the-counter (OTC) equity derivative transaction linked to the worst performing share among those set out below with 'autocall' and 'memory coupon' features. Forms of contract documentation governing this type of transactions can be found at: http://bcs-sp.com/otc/. You may invest not less than USD13167 in the product.

Under the applicable laws and regulations of the Republic of Cyprus it may be required for you to enter into OTC derivative transactions with Brokercreditservice Structured Products Plc through a duly authorized and regulated investment firms (including BrokerCreditService (Cyprus) Ltd or BCS Capital (DIFC) Limited) acting as agent for and on your behalf (**intermediary**). Brokercreditservice Structured Products Plc does not guarantee that any intermediary will agree to act for and on your behalf in entering into any such transactions.

### Objective

The product is designed to provide a return in the form of (1) conditional coupon payments and (2) a cash payment depending on the **worst performing share** current price as of Redemption Valuation Date (as defined below) on termination of the product. The timing and amount of these payments will depend on the performance of the underlying shares. The product has a fixed term and will terminate on the **maturity date** (as defined below), unless terminated early. If, at redemption valuation date, the worst performing share's **current price** (as defined below) has fallen below 70,00% of its **initial price** (as defined below), you will receive the worst performing share in its **volume** (as defined below) and, consequently, **LOSE UP TO YOUR ENTIRE INVESTMENT. Coupon**. If on any **event determination date** (as defined below) the worst performing share's current price *is at or above* 70,00% of its initial price you will, within two (2) business days following that event determination date, receive a **coupon** equal to 21,00% per annum on the amount of the notional amount calculated for the period starting from the immediately preceding event determination date or, in respect of the first coupon, **valuation date** (as defined below) plus any unpaid coupon(s) for the previous period(s).

**Early termination following an autocall**. The product will terminate prior to the maturity date if, on any event determination date, the current price of each underlying share *is at or above* 100,00% of its initial price. In such case, you will, within two (2) business days following that event determination date, receive, in addition to any final coupon, a cash payment equal to the notional amount. No further payments will be made on any date after such event determination date.

Termination on the maturity date. If the product has not terminated early, on the maturity date, you will receive:

- (1) if the worst performing share's current price on the redemption valuation date *is at or above* 70,00% of its initial price, a cash payment equal to the notional amount; or
- (2) if the final reference level of the worst performing share is below 70,00% of its initial price on the redemption valuation date, the Seller shall pay to the Buyer amount of the product of the Current Price of the Worst Performing Share and the Volume within 5 Business Days from the Maturity Date.

**Potential adjustment events.** If during the lifetime of the product a split, consolidation or any other event having a diluting or concentrative effect on the theoretical value of the relevant underlying share occurs the terms of the product may be correspondingly adjusted and you will be duly notified of such adjustment.

**Extraordinary events.** If during the term of the product any extraordinary event (such as nationalization, insolvency or delisting) occurs in respect of an issuer of any underlying share, such share's current price in respect of any date for the purposes of the product shall be decreased by 30%. Consequently, due to an extraordinary event you may **LOSE UP TO YOUR ENTIRE INVESTMENT**.

Investment USD 100	nvestment USD 10000				
Scenarios		12 months	24 months	Maturity, 3 years,	
				(Recommended holding period)	
Stress scenario	What you might get back after costs:	USD 228	USD 828	USD 78	
	Average return each year:	-97.72%	-71.20%	-80.16%	

Unfavourable	What you might get back after costs:	USD 6,551	USD 3,627	USD 1,562
scenario	Average return each year:	-34.49%	-39.75%	-46.15%
Moderate	What you might get back after costs:	USD 9,464	USD 9,264	USD 7,152
scenario	Average return each year:	-5.36%	-3.75%	-10.57%
Favourable	What you might get back after costs:	USD 12,122	USD 17,411	USD 37,138
scenario	Average return each year:	21.22%	31.92%	54.86%

This table shows the money you could get back over the next 36 months under different scenarios, assuming that you invest USD 10 000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. In addition, you should note that the results shown for the intermediate holding periods do not reflect estimates of the product's future value. You should therefore not base your investment decision on the results shown for these interim holding periods.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. For more information, see "How long should I hold it and can I take money earlier?" below.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor [or distributor (intermediary)]. The figures do not take into account your personal tax situation, which may also affect how much you get back.

# What happens if Brokercreditservice Structured Products Plc is unable to pay out?

You are exposed to the risk that Brokercreditservice Structured Products Plc might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not a deposit and as such is not covered by any deposit protection scheme.

# What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest USD 10 000. The figures are estimates and may change in the future.

### Cost over Time and Composition of Costs

Scenarios If you cash in after 12		If you cash in after 24	If you cash in at the end of the			
	months	months	recommended holding period			
Total costs	USD 124,00	USD 124,00	USD 0,00			
Impact on return (RIY)	1,24%	0,618%	0,00%			
per vear						

### Composition of costs:

The table below shows

• The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;

• The meaning of the different cost categories.

One-off	Entry costs	0,00%	The impact of these costs is already included in the price.	
costs	Exit costs	1.24%	The impact of the costs of exiting your investment when it terminates by your decision.	
The costs shown in the table above represent how much the expected costs of the product would affect your return, assuming				

the product performs in line with the moderate performance scenario. The total costs are composed of the **early termination cost** up to 35% of the amount you invest.

# How long should I hold it and can I take money earlier?

Recommended holding period: 36 months

The product aims to provide you with the return described under "What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until the maturity date.

You, however, have an option to terminate the product early. In case you do so you will, within 5 (five) business days upon the proposed early termination date receive the **early termination amount** equal to 65% of the Notional multiplied by the lesser of (a) one; or (b) the ratio between the Worst Performing Share's Current Price as of Early Termination Valuation Date and 100% of its initial value. The Brokercreditservice Structured Products Plc may at its own discretion increase the Early Termination Amount.

### How can I complain?

Any complaint regarding the conduct of the person advising on, or distributing, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted by e-mail at info@bcs-sp.com; by telephone at: +357 257 74044; or by post at: Office 203, Kofteros Business Center, 182, Agias Filaxeos, 3083, Limassol
