You are about to purchase a product that is not simple and may be difficult to understand

## WHAT IS THIS PRODUCT?

**TYPE** The product is in the form of a debt instrument.

**OBJECTIVES** To provide interest payment(s), in return for the risk of loss of capital. Amounts stated below are in respect of each Nominal Amount that you invest.

- **Interest** : If the Worst Underlying Performance is greater than or equal to -15%, on any Interest Valuation Date, You will receive the Interest Amount 1 on the immediately following Payment Date. Otherwise, if the Worst Underlying Performance is greater than or equal to -25%, on any Interest Valuation Date, you will receive Interest Amount 2 on the immediately following Payment Date. Otherwise, if the Worst Underlying Performance is greater than or equal to -35%, on any Interest Valuation Date, you will receive Interest Amount 3 on the immediately following Payment Date. Otherwise, no interest will be paid on that Payment Date.
- **Autocall Event**: If the Worst Underlying Performance is greater than or equal to 0% on any Autocall Valuation Date, the product will be redeemed early and you will receive the Nominal Amount (in addition to any interest payable) on the immediately following Payment Date. No further payments of principal or interest will be made following such payment and early redemption.
- **Redemption on the Maturity Date**:
  - **Redemption Amount**: If the product is not redeemed early, then you will receive one of the following:
    - You will receive the Nominal Amount.
    - If on the Maturity Date the Closing Price of the worst performing Underlying is less than 35% of the Initial Level (representing a decline of more than 65% from the Initial Level), your Initial Capital (nominal amount you invested) will be lost at a rate of 1% for every 1% the Closing Price of the worst performing Underlying is below the Start Level.
  - **The amount paid in such case will be less than the Nominal Amount and you may lose some or all of your capital.**

#### Early redemption and adjustments

The terms of the product provide that if certain defined events, in addition to those described above, occur (principally but not exclusively in relation to any Underlying, or the Manufacturer of the product (which may include the discontinuation of the Manufacturer's ability to carry out the necessary hedging transactions)), adjustments may be made to the terms of the product to account for the relevant event or the product may be early redeemed. The amount paid on any early redemption may be less than the amount originally invested.

#### INTENDED RETAIL INVESTOR

This product is intended for clients who:

- have significant knowledge and experience in products such as the one described in this document
  - are willing and able to bear a potentially total loss
  - have a risk tolerance consistent with the summary risk indicator in this document
  - are expressing a view on the underlying consistent with the conditions for a positive outcome (as stated in the product description)
  - have a horizon consistent with the term of this product
- as determined independently or on the basis of professional advice.

### WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

#### SUMMARY RISK INDICATOR

**The risk indicator assumes you keep the product until 19 February 2025. The actual risk can vary significantly if you cash in at an early stage and you may get back less.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because BCS is not able to pay you. We have classified this product as 6 out of 7, which is the second-highest risk class. This classification takes into consideration two elements: 1) the market risk - that rates the potential losses from future performance at a high level; and 2) the credit risk which estimates that poor market conditions will likely impact the capacity of THE ISSUER to pay you. **Be aware of currency risk. If you will receive payments in a currency other than the official currency of the Member State where the product is marketed, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** A risk that is materially relevant to the product but not included in the summary risk indicator is the risk that in the event the product redeems early due to an autocall, you may be unable to reinvest your money at an attractive rate. This product does not include any protection from future market performance so you could lose some or all of your investment. If THE ISSUER is not able to pay you what is owed, you could lose your entire investment.

(Ω) Product matured early, prior to specified term.

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest USD 10,000. The scenarios shown illustrate how your product could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. You will either be unable to early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## WHAT HAPPENS IF BCS IS UNABLE TO PAY OUT?

This product is not protected by any investor compensation or guarantee scheme. If is unable to make a payment and/or is in default, you may lose some or all of your invested amount and any payment may be delayed.

## WHAT ARE THE COSTS?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for 3 different holding periods. They include potential early exit penalties. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

## COSTS OVER TIME

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

### Recommended holding period: 5 years, or until an automatic early redemption event occurs

The recommended holding period is selected to correspond with the maturity date of the product. Please note that you may not be able to sell the product prior to the maturity date. If you are able to sell the investment at an earlier date, you may incur costs and may lose part or all of your investment.
