WHAT IS THIS PRODUCT?

TYPE	The product is in the form of a debt instrument, governed by English law.
OBJECTIVES	<p>To provide conditional interest payments in return for the risk of loss of capital and interest upon the occurrence of Credit Events in respect of Dell Inc, General Motors Co, Marks and Spencer PLC, Nokia Oyj, Petroleo Brasileiro SA Petrobras and Rolls-Royce PLC or any successors (the "Reference Entities").</p> <p>How the return is determined: Interest Rate: Unless a Credit Event occurs, a fixed rate of 11%. Credit Events: Credit Events relate to the credit risk of the Reference Entity during a specified period (which may start before the Trade Date) and include: Bankruptcy including forms of insolvency and resolution processes-[and] Failure to Pay in respect of qualifying debt obligations. Credit Events are generally determined by a committee established by the International Swaps and Derivatives Association (ISDA®) and comprised of credit derivatives market participants (a "CDDC"). Such determinations are based on publicly available information. In the absence of such a determination, the Calculation Agent may determine whether a Credit Event has occurred, on the basis of appropriate supporting information (if any). The credit risk taken on a Reference Entity is indirect, so there is no direct investment in a Reference Entity and you will have no claim against it.</p> <ul style="list-style-type: none">• If no Credit Event occurs:<ul style="list-style-type: none">▪ Interest Amount on each Interest Payment Date: You will receive the Nominal Amount multiplied by the Interest Rate and adjusted to reflect the number of days in the relevant period relative to one year in accordance with the applicable day count fraction.▪ Redemption on the Scheduled Maturity Date: You will receive the Nominal Amount on the Scheduled Maturity Date, subject to a suspension as described below. <p>Payments may be suspended while a Credit Event is being considered. If it is ultimately determined no Credit Event occurred, suspended amounts will be payable but after a possible substantial delay and without interest on due amounts for the deferral periods.</p> <ul style="list-style-type: none">• If a Credit Event Occurs:<ul style="list-style-type: none">▪ Credit Event Reduction Factor: On any date, this factor is first set to 100%. Any reference entity in the Reference Entities that experienced a credit event up to that date will decrease the factor by 100%. The factor is subject to a minimum of 0%.▪ Interest Amount on each Interest Payment Date: You will receive the Nominal Amount multiplied by the Interest Rate and further multiplied by the Credit Event Reduction Factor on the relevant Interest Observation Date (adjusted to reflect the number of days in the relevant period relative to one year in accordance with the applicable day count fraction).▪ Redemption Amount on the Scheduled Maturity Date: You will receive the Nominal Amount multiplied by the Credit Event Reduction Factor on the Scheduled Maturity Date. <p>Key Dates and Values All determinations and observations will be made by the Calculation Agent. All dates may be subject to adjustment for non-business days and market disruption events.</p>

- **Calculation Agent:** Brokercreditservice Structured Products Plc

Early redemption and adjustments

The terms of the product provide that if certain defined events occur (principally in relation to the product, any underlying, or the manufacturer of the product (which may include the discontinuation of the manufacturer's ability to carry out the necessary hedging transactions)), adjustments may be made to the terms of the product to account for the relevant event or the product may redeem early. The amount paid on any early redemption may be less than the amount originally invested.

Returns may depend on determinations of credit events by a CDDC and a recovery price by ISDA auction. The return of capital may be reduced, suspended, delayed or may be zero following a credit event.

INTENDED RETAIL INVESTOR

This product is intended for clients who:

- have no experience in products such as the one described in this document and have a good level of knowledge regarding the market and financial instruments/risks and understands the specific factors highlighted in the literature provided to them
- are willing and able to bear a potentially total loss
- have a risk tolerance consistent with the summary risk indicator in this document
- are expressing a view on the underlying consistent with the conditions for a positive outcome (as stated in the product description)
- have a horizon consistent with the term of this product as determined independently or on the basis of professional advice.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

SUMMARY RISK INDICATOR

The risk indicator assumes you keep the product until 30 June 2025. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because BCS is not able to pay you. We have classified this product as 6 out of 7, which is the second-highest risk class. This classification takes into consideration two elements: 1) the market risk - that rates the potential losses from future performance at a high level; and 2) the credit risk which estimates that poor market conditions will likely impact the capacity of Brokercreditservice Structured Products Plc to pay you. **Be aware of currency risk. If you will receive payments in a currency other than the official currency of the Member State where the product is marketed, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** A risk that is materially relevant to the product but not included in the summary risk indicator is the risk that in the event the product redeems early due to an early call, you may be unable to reinvest your money at an attractive rate. This product does not include any protection from future market performance so you could lose some or all of your investment. If Brokercreditservice Structured Products Plc is not able to pay you what is owed, you could lose your entire investment.

(Ω) Product matured early, prior to specified term.

This table shows the money you could get back over the next 5.1 years, under different scenarios, assuming that you invest RUB 70,000. The scenarios shown illustrate how your product could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. You will either be unable to early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, and include the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF BCS IS UNABLE TO PAY OUT?

This product is not protected by any investor compensation or guarantee scheme. If Brokercreditservice Structured Products Plc is unable to make a payment and/or is in default, you may lose some or all of your invested amount and any payment may be delayed.

WHAT ARE THE COSTS?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for 3 different holding periods. They include potential early exit penalties. The figures assume you invest RUB 70,000. The figures are estimates and may change in the future.

COSTS OVER TIME

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended holding period: 5.1 years

The recommended holding period is selected to correspond with the maturity date of the product. Please note that you may not be able to sell the product prior to the maturity date. If you are able to sell the investment at an earlier date, you may incur costs and may lose part or all of your investment. The manufacturer is under no obligation to make a secondary market in the product, but may choose to re-purchase the products early on a case-by-case basis. Further information is available upon request.
