Section D - Risks

Element	Title	
D.2	Risks Specific to the Issuer:	<p>The Issuer is exposed to market price risk, interest rate risk, credit risk, liquidity risk, currency risk and capital risk management arising from the financial instruments it holds as set out below.</p> <p><i>Market price risk</i></p> <p>Market price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices. The Issuer's available-for-sale financial assets and financial assets at fair value through profit or loss are susceptible to market price risk arising from uncertainties about future prices of the investments. The Issuer's market price risk is managed through diversification of the investment portfolio.</p> <p><i>Interest rate risk</i></p> <p>Interest rate risk is the risk that the value of financial instruments will fluctuate due to changes in market interest rates. Borrowings issued at variable rates expose the Issuer to cash flow interest rate risk. Borrowings issued at fixed rates expose the Issuer to fair value interest rate risk. The Issuer's management monitors the interest rate fluctuations on a continuous basis and acts accordingly.</p> <p><i>Credit risk</i></p> <p>Credit risk arises when a failure by counterparties to discharge their obligations could reduce the amount of future cash inflows from financial assets on hand at the reporting date. The Issuer has no significant concentration of credit risk. The Issuer has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history and monitors on a continuous basis the ageing profile of its receivables. Cash balances are held with high credit quality financial institutions and the Issuer has policies to limit the amount of credit exposure to any financial institution.</p> <p><i>Liquidity risk</i></p> <p>Liquidity risk is the risk that arises when the maturity of assets and liabilities does not match. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The Issuer has procedures with the object of minimising such losses such as maintaining sufficient cash and other highly liquid current assets and by having available an adequate amount of committed credit facilities.</p>
		<p><i>Currency risk</i></p> <p>Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognised assets</p>

		<p>and liabilities are denominated in a currency that is not the Issuer's measurement currency. The Issuer is exposed to foreign exchange risk arising from various currency exposures primarily with respect to the US Dollar and Russian Roubles. The Issuer's management monitors the exchange rate fluctuations on a continuous basis and acts accordingly.</p> <p><i>Capital risk management</i></p> <p>The Issuer manages its capital to ensure that it will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Issuer's overall strategy remains unchanged from last year.</p> <p><i>Risks associated with Russian entities</i></p> <p>Some Members of the Group (i.e. BrokerCreditService Ltd and Joint Stock Company "BCS-Investment Bank" are Russian Companies (the "Russian Group Companies") and most of their fixed assets are located in, and a significant portion of the Group's revenues are derived from, Russia.</p> <p>There are certain risks associated with an investment in financial instruments issued by Russian businesses and in the Russian economy generally, which may adversely affect the Group's operations including, without limitation the: (i) political instability in Ukraine and other states and the imposition of various sanctions by the United States, the European Union and other countries on Russian, Ukrainian and other nations' individuals and legal entities; (ii) conflicts between federal and regional authorities and other political factors within Russia; (iii) recent economic instability in Russia; (iv) underdeveloped nature of the Russian banking system which has a limited number of creditworthy banks; (v) risk of the imposition of severe limitations or a prohibition on certain hard currency payments and operations; (vi) underdeveloped nature of the Russian legal system applicable to the market economy; (vii) Governmental authorities in Russia have a high degree of discretion and may at times exercise their discretion arbitrarily, without hearing or prior notice, or in a manner that is influenced by political or commercial considerations; (viii) Russian taxation system is not well developed and is subject to frequent changes; and (ix) interpretation of transfer pricing legislation is uncertain and no court guidance has been provided so the Group may need to make future adjustments.</p>
D.3	Risks Specific to the Notes:	<p>In addition to the risks relating to the Issuer (including the default risk) that may affect the Issuer's ability to fulfil its obligations under the Notes, there are certain factors which are material for the purposes of assessing the market risks associated with Notes, including that: (i) the Notes are unsecured obligations; (ii) the trading market for Notes may be volatile and may be adversely impacted by many events; (iii) an active secondary market may never be established or may be illiquid and that this may adversely affect the value at which an investor may sell its Notes (investors may suffer a</p>

		<p>partial or total loss of the amount of their investment); (iv) Notes including leverage involve a higher level of risk and whenever there are losses on such Notes those losses may be higher than those of a similar security which is not leveraged; (v) exposure to the Underlying Reference may be achieved by the Issuer entering into hedging arrangements, potential investors are therefore exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Notes; (vi) the Notes may be redeemed in the case of illegality or impracticability and such cancellation or redemption may result in an investor not realising a return on an investment in the Notes, (vii) the meetings of Noteholders provisions permit defined majorities to bind all Noteholders; (viii) any judicial decision or change to an administrative practice or change to English law after the date of the Base Prospectus could materially adversely impact the value of any Notes affected by it; and (ix) investors are exposed to the credit of more than one reference entity.</p> <p>In certain circumstances Noteholders may lose the entire value of their investment.</p>
D.6	Risk warning	<p>See Element D.3 above.</p> <p>In the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to repay the Notes when repayment falls due, an investor may lose all or part of his investment in the Notes.
